

# Reiniger P

Cleaning agent for unhardened PUR foam in foam dispensing guns

## AREAS OF APPLICATION

Cleaning of unhardened PUR foam in foam dispensing guns with a substance based on acetone.

## APPLICATION INSTRUCTIONS

### Application

Unscrew PUR foam cartridge from the applicator gun; at the same time, hold the valve opening away from your body.

Screw the cleaning agent P with applicator attachment to the applicator gun and purge the gun, to flush out any remaining foam in the gun.

Then, allow the cleaning agent to take effect for approx. 15 minutes and then, thoroughly flush out the content by spraying.

Unscrew the applicator gun.

Remove excess cleaning agent from the adapter using a rag.

Spray Vaseline onto the adapter thread, to avoid adhesion between the applicator gun and the PUR foam can.

If work is immediately continued after that, screw the new PUR foam can into place and flush out the applicator gun thoroughly by means of spraying, so that the rest of the cleaning agent is completely removed from the gun. The applicator gun is then ready to be used again.

## STORAGE

Protect against sunlight and temperatures > 50°C.

## PACKAGING INFORMATION

### Packaging unit

Can approx. 500 ml

## OTHER INFORMATION

### Information on safety

The information provided in the current safety data sheet applies.

### Transportation

We are more than happy to provide you with the EC safety data sheet upon request.
